HANDS ON INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN PRIMARY EDUCATION USING MINECRAFT

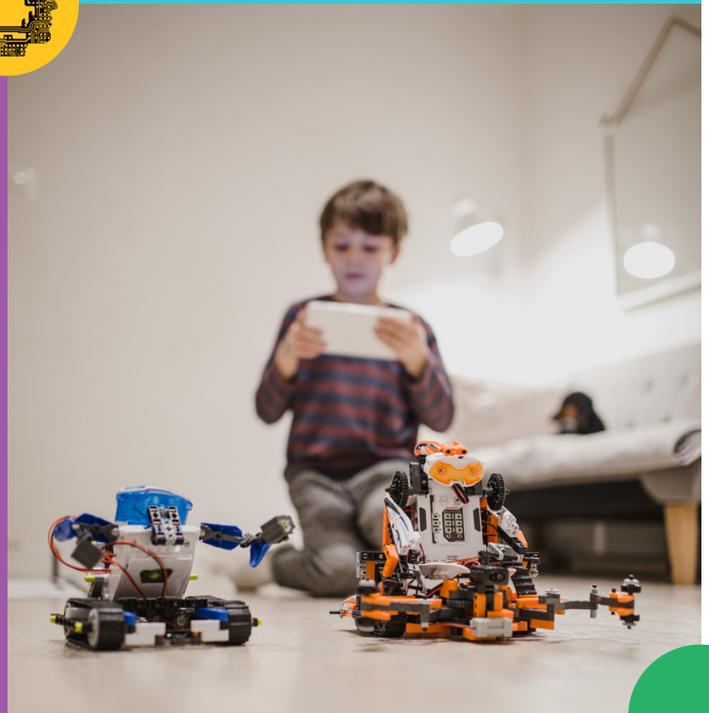

About the project

In this era of rapid technological changes, there are growing debates around the idea of Artificial Intelligence (AI), and the dangers and opportunities it entails. The reason why there's so much talk about AI and how it could change our future is because AI-based solutions are already being implemented in various products and technologies across different sectors. On the 19th May 2021, in the resolution on "artificial intelligence in education, culture and the audio-visual sector", the European Parliament highlighted the growing importance of AI in our daily activities, recognizing the need to invest further in "digital education and media training".

The Kick-off meeting

The Kick-off meeting of the Erasmus+ KA2 School project SAINT: hands on introduction to Artificial Intelligence in primary education using minecraft, took place on the 15th of December 2022, in Lille France. During the meeting, the overview of the project was presented, along with the initial steps of the results of the project to be implemented. In addition, the dissemination and Quality Assurance plans were presented by the leaders, At the end of the meeting, administration issues were discussed and deadlines for the upcoming tasks were set for the consortium.

What's next?

The next steps are mainly focused on Project Results 1 After discussions the consortium agreed on the activities to be carried out for the successful development and completion of the project.
